Updated text snapshot: 21 August 2026 - desktop layout - synthetic data

How to use this packet

Tick each box after reviewing the matching screen. Each screen is kept to one PDF page; zoom in for long forms.
The users-and-roles capture records the current render error so it can be tracked during review.

NEW SIGNAL

Start a radio project

Make the plan concrete now; you can refine it as the build changes.

01

The build

What are you making, and where is the work?

Project name

Portable satellite station

Description

I'm building a portable 2m/70cm station to receive and eventually transmit through amateur satellites.

Public GitHub repository

https://github.com/you/project

It needs a README explaining setup/use and commits that show the build progressing.

Project track

Electronics hardware

Choose the track that best fits your ham-radio project.

Project type

Choose one

How is this a ham-radio project?

Cancel

Create project

Studying or completing a course by itself is not a project. You must make working electronics or software.

Tags

antenna, satellites, SDR

Comma separated.

AI statement

optional

What did AI help with, if anything?

02

Your location and radio path

Rules for owning, importing, and transmitting with radios vary by country.

Country or territory

ASSIGNMENT

Casey Reviewer

Release

DECISION

Finish review

[Open the current YSWS review policy ↗](#)

Decision

Choose...

YSWS approval checks

- ☐ Genuinely related to amateur radio
- ☐ Working MVP with a public demo/download/video requiring under two minutes of setup
- ☐ Public source, useful README, and incremental commits
- ☐ Reproducible; hardware includes applicable BOM, schematic/wiring, editable CAD, and firmware
- ☐ Screenshot, repository, Hacktime, and devlogs match the claimed work
- ☐ Original/attribution work; not a school assignment or paid Hack Club work
- ☐ Hours are genuine and not previously rewarded; when uncertain, reduced to supported time

Technical review notes

Required for approval. Record the concrete features and evidence you checked.

Approved minutes

225

Cannot exceed the 225 minutes evidenced in devlogs.

Time adjustment reason

Explain any reduction from the evidenced Hacktime total.

Message to participant

Required when returning for changes or denying.

Private reviewer notes

Only organizers can see this.

Save decision
